Expedition Overview

Annapurna is a spectacular series of peaks in the Himalayas, stretching across a 55 km long massif in north-central Nepal. Its highest point, **Annapurna I (8,091m)**, proudly ranks as the **10th-highest mountain in the world** and is one of the iconic **14 eight-thousanders**. Despite its incredible beauty and prestige, Annapurna is widely regarded as **one of the most technical and dangerous** 8000m peaks. The steep terrain, avalanche-prone slopes, and historically high fatality rate make it a challenge only for the most skilled and determined mountaineers.

Although Annapurna I was the **first 8,000-meter peak ever climbed** (in 1950), it remains **one of the least-attempted eight-thousanders** due to its demanding nature. Its name, *Annapurna*, originates from Sanskrit — meaning “full of food,” symbolizing nourishment and abundance. In Hindu culture, **Goddess Annapurna** represents fertility, harvest, and the sustaining energy of life.

Annapurna I Expedition – Spring 2026 14 Peaks Expedition is thrilled to open registrations for our **Spring 2026 Annapurna Expedition**, beginning **March 20, 2026**. Led by highly experienced Sherpa guides and supported by premium logistics, this climb offers a rare opportunity to take on one of the **most revered and challenging mountains on Earth**.

Why Climb Annapurna with 14 Peaks Expedition?

- Sherpa-led team with world-class high-altitude expertise
- Strong focus on safety, acclimatization & responsible climbing
- Comprehensive expedition support and seamless logistics
- A chance to stand on the summit of a legendary 8000m peak

Take the challenge. Make history with us. Join the **Annapurna Spring 2026 Expedition** and rise to the top of the world's most respected mountain.
