## Expedition Overview

Gasherbrum II (8,034m), the world's 13th highest peak, forms a major part of the majestic Gasherbrum massif in the Karakoram Range. This group includes six prominent peaks, with Gasherbrum I and II rising above 8,000 meters—earning their respected place among the world's highest summits. Known for its relatively more "approachable" route compared to neighboring giants, Gasherbrum II is often considered a favored choice for those aiming to grow into the elite league of 8000-meter climbers. However, its beauty and technical challenges ensure it remains an accomplishment only for the well-prepared and determined.

Historically, Gasherbrum II was first explored in 1909 by an Italian expedition led by Prince Luigi Amedeo, the Duke of Abruzzi—a legendary figure in early Himalayan and Karakoram exploration. His journey marked the beginning of humankind's connection with this towering snow pyramid.

**Gasherbrum II Expedition – Summer 2026** 14 Peaks Expedition is excited to organize the Gasherbrum II Expedition for the Summer 2026 climbing season, with the adventure kicking off on **June 10, 2026**. With our expert Sherpa leadership, industry-leading logistics, and a focus on safety and success, we offer climbers the opportunity to reach one of the most compelling summits in the Karakoram. Step into the world of high-altitude legend—take on Gasherbrum II with 14 Peaks Expedition and elevate your mountaineering journey to the next level
